Stata Analysis Results

Generated from Snakemake Pipeline

August 7, 2025

1 Introduction

This document presents the results from the Stata analysis conducted as part of the Snakemake pipeline. The following table shows the summary statistics generated from the analysis.

2 Results

Table 1: Summary Statistics

	count	mean	sd	min	max
			(1)		
x	1000	0.497	0.292	0.001	0.999
y	1000	1.008	0.289	0.501	1.499
Observations	1000				

Notes: This table shows descriptive statistics for all variables.

3 Conclusion

The above table presents the descriptive statistics for the variables x and y in our dataset. The analysis shows that both variables are approximately centered around zero with standard deviations close to 1, suggesting they may be standardized or normalized variables.
